Int. J. Bio-Medical Computing, 20 (1987) 311–312
Elsevier Scientific Publishers Ireland Ltd.

INTERNATIONAL JOURNAL OF BIO-MEDICAL COMPUTING

CONTENTS

Volume 20 (1987)

Commentary 1–7
Computing with light
Implants in the cochlea of deaf
Obtaining more from the laboratory computer
Variable heart rate pacemaker
J.G. Llaurado (U.S.A.)

LILLY – Linear least squares curve fitting program for one indepentent variable
A.E. Aubert and H. De Geest (Louvain, Belgium). 9–19

A frontal compartment model to study the kinetics of strontium metabolism in man
Y. Cherruault and V.B. Sarin (New Delhi, India) 21–26

A four compartment linear mammillary model
Y. Cherruault and V.B. Sarin (Paris, France) 27–33

The biological foundation of the Gompertz model
X. Xu (Shangai, China). 35–39

A study on the best order for autoregressive EEG modelling
F. Vaz, P.G. De Oliveira and J.C. Principe (Aveiro, Portugal) 41–50

Heart rate variability signal processing: a quantitative approach as an aid to diagnosis in cardiovascular pathologies
G. Baselli, S. Cerutti, S. Civardi, F. Lombardi, A. Malliani,
M. Merri, M. Pagani and G. Rizzo (Milan, Italy). 51–70

Human versus machine: a comparison of a computer 'expert system' with human experts in the diagnosis of vaginal discharge
T. Chard (London, U.K.). 71–78

Identification of cellular and subcellular features by means of digital microscopy
P. Gualtieri and L. Barsanti (Pisa, Italy) 79–86

Filter transient response to EEG waveforms
S. Shirakawa, J.R. Smith and K. Azumi (Gainsville, FL). 87–95

Simulations of steady quaternary gas diffusion between alveolar and blood compartments
A.B. Jebria (Bordeaux, France) 97–105

Reference master: a microcomputer-based storage and retrieval system for bibliographic references
K. Schmid and G. Böhmer (Mainz, F.R.G.) 107–131

Medical diagnosis: are expert system needed?
A. Bouckaert (Brussesl, Belgium) 123–133

The use of a multi-channel Kalman filter algorithm in structural analysis of the epileptic EEG
P. Penczek, W. Grochulski, J. Grzyb and M. Kowalczyk (Warsaw, Poland) 135–151

Book Reviews 153–154
Announcements 155
Commentary 157–162
Molecular computer
Surveillance by computer of hospital infections and antibiotic use
J.G. Llaurado (U.S.A.)
Exponential model for a regulatory enzyme. Computer program for the determination of the model constants from initial velocity data
S. Ainsworth, J. Kinderlerer and N. Rhodes (Sheffield, U.K.) 163–173
Computer-aided information system to support direct patient care.
The application of a hand-held data collector in a Department of Medicine
Y. Levo, M. Averbuch, Z. Halpern and P. Jordan (Tel Aviv, Israel) 175–179
A reliable and inexpensive microprocessor system for collection and transfer of raw immunoassay data
S.I. Bennett and W.A. Sadler (Christchurch, New Zealand) 181–190
The process of gas exchange in the pulmonary circulation incorporating the contribution of axial diffusion
A. Aminataei, M. Sharan and M.P. Singh (New Delhi, India) 191–209
Steady pressure-flow relationship in a cast of the upper and central human airways
A.B. Jebria, Z. Tabka and P. Techoueyres (Bordeaux, France) 211–224
Book review 225–226
Softward review 227–228
Announcements 229–231
Commentary 233–238
Advances in sensory devices for medicine
Correlation between spectra of respiratory sounds and flow rates
Pursuing human intelligence
Spectroscopic data computerization
J.G. Llaurado (U.S.A.)
Medical applications of computers: An overview
A. Hasman (Limburg, The Netherlands) 239–251
Effect of sampling frequencies on the velocity of slow and fast phases of nystagmus
M. Juhola and I. Pyykkö (Helsinki, Finland) 252–263
Quantitative analysis of mitogen-stimulated cellular proliferation: effect of concanavalin A and thymosin interaction
H.H. Lee and M.G. Mutchnick (Detroit, MI) 265–273
Chronotopocardiography: A new method for presentation of orthogonal electrocardiograms and vectorcardiograms
L.I. Titomir and I. Ruttkay-Nedecký (Moscow, U.S.S.R. and Sienkiewiczova, Czechoslovakia) 275–282
On the dimension of the cortical EEG
K.W. Leszczynski (Warsaw, Poland) 283–288
A computer-aided three-dimensional reconstruction of brain structures using high level computer graphics
A.E.P. Villa, M. Bruchez, G.M. Simm and S. Jeandrevin (Lausanne, Switzerland) . . . 289–302
Announcements 303–304
Subject Index Volume 20 (1987) 305–308
